

# AbleSpace\_Section-2

## Exploratory Test Scenarios

**Environments:** <http://staging.ablespace.io>

**Test Data:** Fictional data only as required by the assignment.

| Test Scenario ID | Test Scenario                  | Check/Result                                                                                                                                          | Bug ID |
|------------------|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------|--------|
| TS-01            | Creating an account            | Verify that a user can create an account using valid fictional data; account creation completed successful                                            | --     |
| TS-02            | Onboarding                     | Verify that the user can complete onboarding by selecting the required role, usage option, and features; onboarding completed successfully.           | BUG-01 |
| TS-03            | Student search                 | Verify search with matching, non-matching, case variations, and leading/trailing whitespace; valid searches worked, but whitespace caused no results. | BUG-02 |
| TS-04            | Student filter using Fullname  | Verify filtering by Full Name and clearing/discarding the filter; filtering worked as expected.                                                       | --     |
| TS-05            | View Student data              | Verify that View Data opens for the selected student and displays the available goal/data sections; opened successfully.                              | --     |
| TS-06            | Adding a goal                  | Verify goal creation with valid and invalid/empty required data; valid goal was created and required description validation worked.                   | --     |
| TS-07            | Updating a goal                | Verify that an existing goal can be edited and the updated information is displayed; update completed successfully.                                   | --     |
| TS-08            | Data persistence after refresh | Verify that student/goal data persists after refresh/reopening; data persisted, but refreshing View Data redirected to Caseload.                      | BUG-03 |
| TS-09            | Adding a Student               | Verify student creation with required fields and valid fictional data; student was created successfully and remained after refresh.                   | --     |
